

# SHP3-6W-4WH/B

0.9m | 3ft Sentinel® High Performance Antenna, single-polarized, 5.925 - 7.125 GHz, PDR Flange, White Antenna, Grey Radome

## Product Classification

Product Type	Microwave antenna
Product Brand	Sentinel®

## General Specifications

Antenna Type	SHP - Sentinel® High Performance Antenna, single-polarized
Polarization	Single
Antenna Input	PDR70
Antenna Color	White
Reflector Construction	One-piece reflector
Radome Color	Gray
Radome Material	Composite Broadband
Flash Included	No
Side Struts, Included	0
Side Struts, Optional	1

## Dimensions

Diameter, nominal	0.9 m   3 ft
-------------------	--------------

## Electrical Specifications

Operating Frequency Band	5.925 – 7.125 GHz
Gain, Low Band	32.3 dBi
Gain, Mid Band	33.6 dBi
Gain, Top Band	34.5 dBi
Boresite Cross Polarization Discrimination (XPD)	30 dB
Front-to-Back Ratio	65 dB
Beamwidth, Horizontal	3.3 °

# SHP3-6W-4WH/B

Return Loss	17.7 dB
VSWR	1.3
Radiation Pattern Envelope Reference (RPE)	7289B
Electrical Compliance	Brazil Anatel Class 2   ETSI EN302217 R1 C3   FCC B2
Cross Polarization Discrimination (XPD) Electrical Compliance	ETSI EN 302217 XPD Category 3
Mechanical Specifications	
Compatible Mounting Pipe Diameter	90 mm–120 mm   3.5 in–4.7 in
Fine Azimuth Adjustment Range	±15°
Fine Elevation Adjustment Range	±15°
Wind Speed, operational	180 km/h   111.847 mph
Wind Speed, survival	250 km/h   155.343 mph

## Antenna Dimensions and Mounting Information

## Wind Forces at Wind Velocity Survival Rating

Axial Force (FA)	3353 N   753.785 lbf
------------------	----------------------

# SHP3-6W-4WH/B

---

Angle $\alpha$ for MT Max	-30 °
Side Force (FS)	-1680 N   -377.679 lbf
Twisting Moment (MT)	1605 N-m   14,205.447 in lb
Zcg without Ice	310 mm   12.205 in
Zcg with 1/2 in (12 mm) Radial Ice	388 mm   15.276 in
Weight with 1/2 in (12 mm) Radial Ice	87 kg   191.802 lb

# SHP3-6W-4WH/B

## Wind Forces at Wind Velocity Survival Rating Image

## Packaging and Weights

Height, packed	1220 mm   48.032 in
Width, packed	470 mm   18.504 in
Length, packed	1120 mm   44.095 in
Packaging Type	Standard pack
Volume	0.64 m³   22.601 ft³
Weight, gross	40 kg   88.185 lb
Weight, net	24 kg   52.911 lb

## Regulatory Compliance/Certifications

# SHP3-6W-4WH/B

Agency	Classification
ISO 9001:2015	Designed, manufactured and/or distributed under this quality management system
* Footnotes	
Operating Frequency Band	Bands correspond with CCIR recommendations or common allocations used throughout the world. Other ranges can be accommodated on special order.
Gain, Mid Band	For a given frequency band, gain is primarily a function of antenna size. The gain of Andrew antennas is determined by either gain by comparison or by computer integration of the measured antenna patterns.
Boresite Cross Polarization Discrimination (XPD)	The difference between the peak of the co-polarized main beam and the maximum cross-polarized signal over an angle twice the 3 dB beamwidth of the co-polarized main beam.
Front-to-Back Ratio	Denotes highest radiation relative to the main beam, at 180° ±40°, across the band. Production antennas do not exceed rated values by more than 2 dB unless stated otherwise.
Return Loss	The figure that indicates the proportion of radio waves incident upon the antenna that are rejected as a ratio of those that are accepted.
VSWR	Maximum; is the guaranteed Peak Voltage-Standing-Wave-Ratio within the operating band.
Radiation Pattern Envelope Reference (RPE)	Radiation patterns define an antenna's ability to discriminate against unwanted signals. Under still dry conditions, production antennas will not have any peak exceeding the current RPE by more than 3dB, maintaining an angular accuracy of +/-1° throughout
Cross Polarization Discrimination (XPD) Electrical Compliance	The difference between the peak of the co-polarized main beam and the maximum cross-polarized signal over an angle twice the 3 dB beamwidth of the co-polarized main beam.
Wind Speed, operational	For VHLP(X), SHP(X), HX and USX antennas, the wind speed where the maximum antenna deflection is 0.3 x the 3 dB beam width of the antenna. For other antennas, it is defined as a deflection is equal to or less than 0.1 degrees.
Wind Speed, survival	The maximum wind speed the antenna, including mounts and radomes, where applicable, will withstand without permanent deformation. Realignment may be required. This wind speed is applicable to antenna with the specified amount of radial ice.

# SHP3-6W-4WH/B

---

<b>Axial Force (FA)</b>	Maximum forces exerted on a supporting structure as a result of wind from the most critical direction for this parameter. The individual maximums specified may not occur simultaneously. All forces are referenced to the mounting pipe.
<b>Side Force (FS)</b>	Maximum side force exerted on the mounting pipe as a result of wind from the most critical direction for this parameter. The individual maximums specified may not occur simultaneously. All forces are referenced to the mounting pipe.
<b>Twisting Moment (MT)</b>	Maximum forces exerted on a supporting structure as a result of wind from the most critical direction for this parameter. The individual maximums specified may not occur simultaneously. All forces are referenced to the mounting pipe.
<b>Packaging Type</b>	Andrew standard packing is suitable for export. Antennas are shipped as standard in totally recyclable cardboard or wire-bound crates (dependent on product). For your convenience, Andrew offers heavy duty export packing options.
